

ADOBE LIGHTROOM CLASSIC WORKSHOP- EQUIPMENT CHECKLIST

Please Come Prepared. A working knowledge of your computer is **ESSENTIAL** for this 'hands-on' workshop. There will be no time to teach computer basics – an ability to navigate your computer, open applications, create folders, re-name folders and save files to specific destinations is required. If any of this sounds difficult, please take a little time to get up to speed before you attend.

Please do not hesitate to contact me if you have any questions about your equipment or software, or any aspect of the workshop. In particular, I suggest you contact me if you are contemplating buying new equipment for the workshop.

Equipment List

- ☐ Computer with at least 16 GB of RAM and 50% of the hard drive available.
- ☐ Adobe Creative Cloud Photography Program which includes:
- ☐ Adobe Lightroom **Classic**, Adobe Photoshop & Bridge installed
- ☐ **(3) EMPTY** ✧ Portable External Hard Drives (2TB or larger).
- ☐ All necessary power cords.
- ☐ Card Reader

✧ All three external drives **MUST be EMPTY**. We will format, name and label the drives together in class. Two of the drives must be able to be plugged into your laptop at the same time.

If you have taken the course before, please use the three hard drives that we set up during the course, you do not need to purchase three additional drives.

Please do not wait until the last day to download or check that the programs are installed. If you have any problems, call Adobe Support at 800-833-6687. Use the Creative Cloud Application to download and install Adobe Lightroom, Photoshop & Bridge. If you can't find Bridge, look under **FIND ADDITIONAL APPS**, via your Creative Cloud application.
